Announcement on Account Change Notification API Optimization

Dear users:

Huobi Global has added a new type of notification (mode=2：accounts.update#2) to the Account Change Notification API, allowing users to receive only one notification message about changes in total and/or available balances in a timely manner.

Effective Date: January 6, 2021 (GMT+8)

Please check [Huobi API Docs](#) for details.

Huobi Global

January 7, 2021 (GMT+8)

How will the API change affect me?

API users need to evaluate how the API improvements will help with their trades and update relevant Apps accordingly.
All changes will be uploaded to [Huobi API Docs](#) upon the effectiveness of the above announcement.

Account Update Subscription

Subject

accounts.update#${mode}

Available Types of Notifications

1. Notifications will be sent when balances change.

2. Notifications will be sent in separate messages when total balances and/or available balances change.

3. Notifications will be sent in one message when total balances and/or available balances change. (New)

Note: You will not receive notifications on changes in balances caused by asset transfers between your exchange and futures accounts.

Parameter

Parameter	Type of Data	Description
mode	integer	Notification type; Virtual value: 0, 1, 2; Default value: 0

Examples
